Re: Cozzi Iron & Metal, Inc. ("Cozzi") - Request for Additional Information

Dear Mr. LaRose,

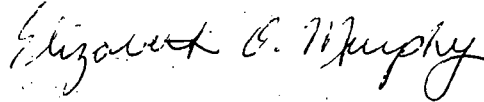

After reviewing the information provided by Cozzi in response to U.S. EPA-issued information requests, we have identified some data gaps for which we would appreciate your client's responses. Since these are few in number and presumably will not require extensive time for response, please provide Cozzi's response to this letter on December 6, 1999, the date on which you will be providing additional information responsive to the October 1999 information request. Cozzi's responses will enable us to better prepare for our meeting on December 16, 1999.

For each of the Cometco facility shipments of used oil to the Cozzi main yard identified below, please describe how the used oil was managed upon receipt at the Cozzi main yard. If the used oil was processed, specify in what manner it was processed. If it was stored, please specify how and for what length of time. If it was burned, please identify the unit in which it was burned and provide the specifications (capacity, size, etc.) of the unit in which it was burned. If the used oil was transported off-site, identify by whom and to where it was transported. If it was disposed, identify the method and location of disposal. Please provide any documentation you have that is responsive to these requests.

<u>Date</u>	<u>Amount</u>
10/13/98	5700 gallons
10/9/98	3000 gallons
10/24/97	2800 gallons
10/23/97	900 gallons
10/23/97	850 gallons

Your client's prompt response to this letter will be very much appreciated and, as said above, it will assist in our preparation for the upcoming meeting between Cozzi and U.S. EPA. If you have any questions about this letter, please give me a call at (312) 886-0748.

Sincerely,

A handwritten signature in cursive script, reading "Elizabeth O. Murphy".
